Increasing minority representation in medicine and biomedical research!
About SSA

The Summer Science Academy Day Program is a two week science enrichment program that offers a series of lectures, labs, and field experiences for high school students.

These “hands on” experiences are designed to heighten students’ interest in science and fund of knowledge, increase awareness of careers in science and healthcare, and introduce and/or reinforce some principles of science.

The program is only for students entering the 9th and 10th grades for the 2020-2021 school year.

Topics covered in the program consist of, but are not limited to:

- Physics/ Chemistry/ Biology
- Human Anatomy/ Neuroscience/ Genetics

Core Beliefs

The Summer Science Academy operates under five core principles and beliefs:

1. Science is all around us and a vital part of our lives.

2. All students, regardless of racial and/or socioeconomic background, are able to learn sophisticated principles of science and should be encouraged to pursue careers requiring a scientific background.

3. Students who are female are capable of learning sophisticated principles in science and should be encouraged to pursue careers requiring a scientific background.

4. It is OK to be smart and be a high achiever, especially in the science, math and technology areas.

5. Young people who are nurtured in many areas of their lives thrive and develop the self confidence to set and achieve high goals.
